

AI/ML ENGINEER

Company: InnovateTech AI

Location: Bangalore, India (Hybrid)

Employment Type: Full-time

ABOUT THE ROLE

We are looking for a talented AI/ML Engineer to join our growing team. You will work on developing and deploying machine learning models that power our core products. This role involves working with large-scale data, building production ML pipelines, and collaborating with cross-functional teams.

RESPONSIBILITIES

- Design, develop, and deploy machine learning models for production use.
- Build and maintain scalable ML pipelines using Python and cloud services.
- Collaborate with data scientists to translate research into production-ready solutions.
- Optimize model performance, latency, and resource utilization.
- Implement monitoring and alerting for deployed models.
- Write clean, well-tested, and documented code.
- Participate in code reviews and technical design discussions.
- Stay current with the latest developments in AI/ML.

REQUIRED SKILLS

- Python (Advanced): 2+ years of production Python development.
- Machine Learning (Advanced): Strong understanding of supervised and unsupervised learning algorithms.
- Deep Learning (Intermediate): Experience with neural networks, CNNs, RNNs, or transformers.
- PyTorch or TensorFlow (Intermediate): Hands-on experience with at least one deep learning framework.
- SQL (Intermediate): Ability to write complex queries and work with relational databases.
- Docker (Intermediate): Experience containerizing and deploying applications.
- Git (Advanced): Proficiency with version control workflows.
- MLOps (Beginner): Familiarity with ML deployment and monitoring tools.

PREFERRED SKILLS

- Kubernetes: Experience with container orchestration.
- AWS or GCP: Cloud platform experience for ML workloads.
- Natural Language Processing: Experience with NLP tasks and transformer models.
- Computer Vision: Experience with image classification or object detection.
- FastAPI: Building high-performance APIs.
- Linux: Comfortable working in Linux environments.

QUALIFICATIONS

- Bachelor's or Master's degree in Computer Science, AI/ML, or related field.
- 1-3 years of relevant experience (internships count).
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.

INTERVIEW TOPICS

- Data structures and algorithms.
- Machine learning fundamentals (bias-variance tradeoff, regularization, cross-validation).
- Deep learning concepts (backpropagation, optimization, architectures).
- System design for ML systems.
- Python best practices and design patterns.
- SQL query optimization.
- Model evaluation metrics and methodology.
