

OMSAI RAMACHANDRAN
Software Engineer | AI/ML Enthusiast
Email: omsai@example.com | Phone: +91-9876543210
Location: Hyderabad, India

SUMMARY

Passionate computer science graduate with hands-on experience in Python, machine learning, and web development. Eager to transition into an AI/ML engineering role. Strong foundation in data structures, algorithms, and software engineering principles.

EDUCATION

B.Tech in Computer Science and Engineering
Indian Institute of Technology, Hyderabad
2020 - 2024 | GPA: 8.7/10

SKILLS

Python (Advanced): 3+ years of project experience, built ML pipelines and REST APIs
Machine Learning (Intermediate): Implemented classification, regression, and clustering models
Deep Learning (Beginner): Completed coursework on neural networks, built a basic CNN
SQL (Intermediate): Designed and queried relational databases for multiple projects
Git (Advanced): Daily use for version control and collaboration
Docker (Beginner): Containerized a Flask web application
JavaScript (Intermediate): Built interactive front-end components with React
C++ (Intermediate): Used for competitive programming and systems courses

EXPERIENCE

Software Engineering Intern | TechCorp Solutions, Bangalore
June 2023 - August 2023
Developed a REST API using Python and Flask serving 10,000+ daily requests.
Implemented automated testing with pytest, achieving 85% code coverage.
Collaborated with a team of 5 engineers using Agile methodology.

Research Assistant | AI Lab, IIT Hyderabad
January 2023 - May 2023
Assisted in NLP research on text summarization using transformer models.
Preprocessed and cleaned 50,000+ text documents for training data.
Implemented baseline models using scikit-learn and PyTorch.

PROJECTS

Smart Campus Navigation System
Built a pathfinding application using Python and graph algorithms.
Integrated Google Maps API for real-time campus navigation.
Technologies: Python, Flask, PostgreSQL, React.

Sentiment Analysis Dashboard
Created a sentiment analysis pipeline for product reviews.
Trained a logistic regression classifier with 87% accuracy.
Technologies: Python, scikit-learn, pandas, Streamlit.

CERTIFICATIONS

Machine Learning Specialization (Coursera, Andrew Ng)
Python for Data Science (IBM)

ACHIEVEMENTS

Winner, Inter-college Hackathon 2023.

Published a paper on text summarization at a national conference.
